Prime Laminate offers the best of both worlds.

Hard wearing, great looking high-pressure laminates in large sheet sizes that can be used as a post-formable benchtop, or options that come in a smaller (and more affordable) size for use as a pressed decorative panel.

Background: White Concrete

A larger design selection, new edgetape options and a range of sizes that give you a whole host of creative possibilities. We've made it easy to combine durability and good looks for your interior project.

- The highly durable nature of HPL makes it ideally suited for residential, commercial and high traffic environments such as education, hospitality and healthcare. Great for wall panels, doors, shelving, desking, furniture and interior cabinetry.
- Matched edgetape is now available for all laminates that come in both the Benchtop and Panel size. Most of our Panel designs and a selection of Benchtop-only designs also have edgetape.
- All our Benchtop sizes vary so please use the chart at the back of this book to see sizes and edgetape options.
- Our Panel size laminates are non post-formable and can be pressed onto your choice of high quality MDF or plywood in a range of thicknesses.
- Where designs are available in both Benchtop and Panel size the finish may vary between some of these. Please be sure to check if you are planning to use both options together.
- Anti-microbial properties available for selected designs. All anti-microbial protection includes anti-bacterial. All anti-microbial designs are indicated by an A/M symbol.
- Melamine matches available for five designs.

10 Year Warranty

Hygienic Surface

Scratch Resistant

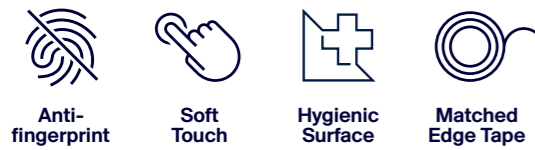

Furniture, Fittings and Flooring Licence No. 3210071

Please see the chart at the back of this book for sheet sizes, thickness, finish variations and edgetape availability. NPF = non post-formable. Note: finishes may vary slightly between some benchtop and panel sizes in the same design. Where this occurs, the different finishes are noted.

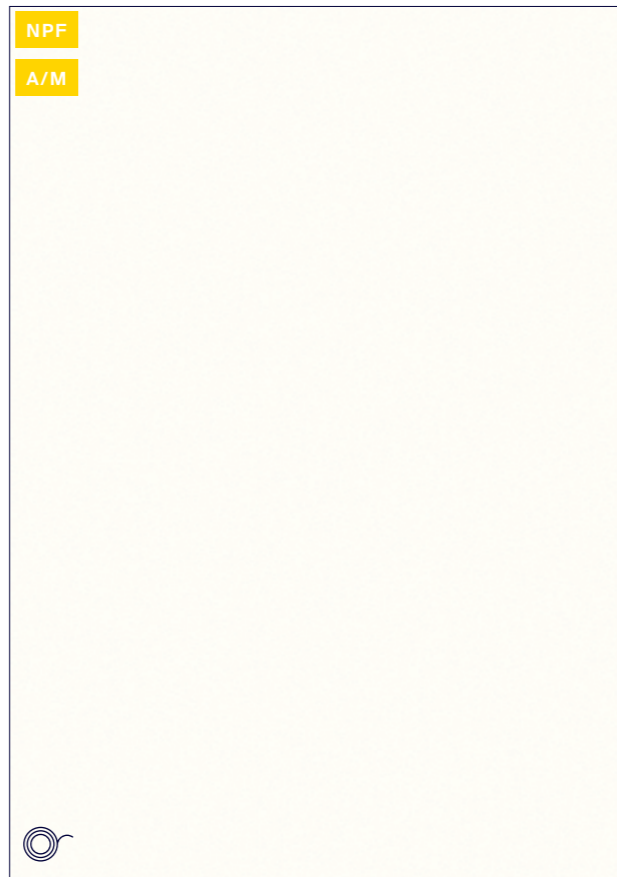

Soft-Matt Laminates

Our range of Soft-Matt laminates is the surface of choice for designers and architects.

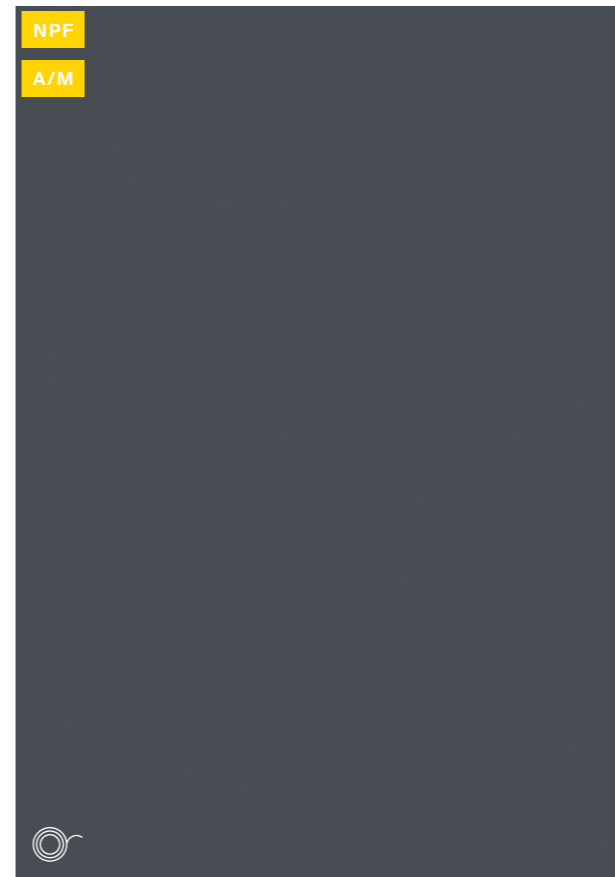

This range meets the demand for a high-performance matt surface that is soft to touch and features anti-fingerprint properties made possible by nano-technology.

This catalogue is intended as a reference to aid selection only – colour swatches here and on our website should not be used for accurate colour matching. Please make sure you view a physical sample before making your final selection.

Edging

We have increased our edgetape offer to cover more than 35 of our most popular designs.

Please refer to the technical resources page of our website, or to the availability chart at the back of this book for details on what edgetape sizing is available. The maximum width is shown on the enclosed chart and this can be cut down on request.

Where edgetape is available for benchtop designs, these will usually be either 53 or 55 mm as the widest option. Panel only designs with an edgetape match will be either 22 or 45mm.

Edgetape is a mix of laser, ABS or PVC depending on supplier.

Substrates

For pressed HPL panels

Prime Panels offers a range of MDF and Plywood substrates for its pressed HPL panels. Birch Ply is a popular choice if you want to leave the edge exposed to create a design effect – though the edge will need to be sealed to prevent moisture.

You can download a copy of the latest substrate chart from the Technical Resources page of the Prime Panels website.

Our MDF and MDF MR substrates are New Zealand made, rated EO for formaldehyde and have Environmental Choice NZ accreditation. We also have a fire rated MDF FR option in black or natural which is also rated EO for formaldehyde.

All our plywood options are sustainably sourced. Birch Ply and Feather Ply have an E1 rating and Gaboon Ply has a Super EO rating.

Help & support

Please refer to the following
pages for further information.

Technical Information

Pressed HPL Panels

Intended Use

Prime Laminate pressed panels are intended for use as a hard-wearing interior panel, suitable for all vertical cabinetry, shelving, doors, wall linings and office furniture. When pressed onto a moisture resistant MDF, panels are well suited to higher moisture areas such as bathrooms, kitchens and laundries. If plywood is used with an exposed edge, these edges must be sealed.

Limitations

Prime Laminate is not suitable for use in exterior applications or interior applications where ambient environmental moisture content is likely to be elevated for extended periods such as interior swimming pool, sauna or industrial wet areas. While Prime Laminate has excellent water and vapour resistance, care should be taken not to expose raw edges or edging to high moisture applications

Where Prime Laminate as a pressed wall or ceiling panel needs to meet the requirements of the New Zealand Building Code, or forms part of a building system, the application and supporting structures must be designed by suitably qualified design professionals.

Environmental Choice NZ

All our pressed HPL panels carry Environmental Choice NZ accreditation when pressed on MDF (standard, moisture-resistant or fire-rated). These are all low formaldehyde with an EO rating.

This means they can contribute valuable points towards Greenstar and Homestar projects.

Benchtop HPL

Intended Use

Prime Laminate is intended for use as a benchtop and is well suited for interior applications where ambient environmental moisture content is likely to be elevated for extended periods such as bathrooms, laundry and kitchen cabinetry.

The majority of the Prime Laminate range in benchtop size is post- formable, with the exception of the Soft-Matt designs.

Limitations

Prime Laminate is not suitable for use in exterior applications and is not structurally graded. Where Prime Laminate is required to meet the requirements of the New Zealand Building Code, or forms part of a building system, the application and supporting structures must be designed by suitably qualified design professionals.

Care and Maintenance

Prime Laminate is low maintenance and easy to clean. For regular cleaning, simply wipe with a clean damp cloth. Stubborn grease and grime can be cleaned using diluted vinegar and water or sugar soap. Stains should be tackled early with hot, soapy water or a standard Spray and Wipe solution.

General cleaning guidelines for different surface finishes*:

Standard finishes	Warm soapy water (or detergent), then wipe with a clean, dry cloth
Soft-Matt finishes	Warm soapy water, then wipe with a clean, dry cloth. Minor marks and scuffs can be removed with a magic sponge such as a Glitz Wipe-Out sponge or a 3M Magic sponge.
Gloss finishes	For a streak-free finish, use a glass cleaner after initial clean, then buff back with a clean, dry cloth
Metallic finishes	Soft, damp cotton cloth with a mild liquid detergent. Glass cleaner will help remove streaks

* After installation, residue may be left behind on the surface from the protective peel film, particularly for the Soft-Matt finish. Follow these quick steps to remove:

- Straight methylated spirits with clean cloth
- Wipe dry with clean cloth
- Repeat
- Wipe down with hot water and a very small amount of dishwashing liquid
- Dry with paper towels
- Buff with a clean, dry cloth

*After installation of Writeable or Magnetic Writeable board, remove the protective film before writing on the board, and remove any adhesive residue by following these quick steps:

- Spray on glass cleaner and wipe away residue adhesive with a clean soft microfibre cloth.
- Wipe dry

***On Writeable panels, use a quality white board marker pen such as an Edding or Staedtler. Once dry, remove writing with a dry microfibre cloth or magic eraser. Periodic cleaning with glass cleaner is recommended. Do not clean with abrasive cleaners or steel wool. Cleaning results can vary significantly due to the various brands of marker pens available therefore it is recommended to test before use.**

Important:

Do not use soapy water or detergent to remove adhesive residue and always wipe with a damp cloth, then a dry cloth after cleaning to remove moisture.

Never use abrasive cleaners or cleaning tools on Prime Laminate such as; Jif, Vim, Brasso, steel wool or abrasive sponges.

Warranty

New Zealand Panels Group offers a 10 year warranty on Prime Laminate, provided it is used for its intended purpose as an interior decorative benchtop or panel, and stored and installed in accordance with best practice, in a tradesman like manner and in accordance with relevant Standards and New Zealand Building Code requirements.

To view a copy of the full warranty, please download from our website at www.primepanels.co.nz

Online help and samples

At primepanels.co.nz our digital front door is open 24/7. You can view our entire colour range, order samples and view or download technical documents and more.

Heres' some features you may find handy.

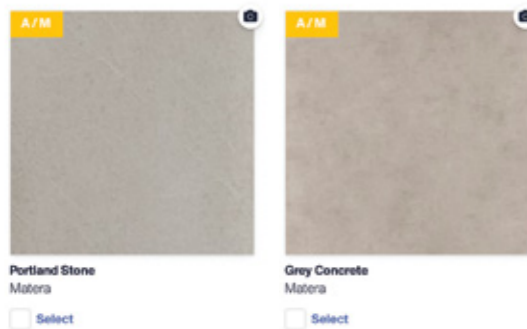

1. Order Samples or Create a Collection - Just use the tick box below any swatch to add it to your Sample Cart or add it to a Collection. Use the checkout cart at the top of the page to have our Samples team despatch your samples to you at no cost. You can also 'add to your Collection' any relevant swatches, images or technical documentation. From your Collection you can download or share the information with anyone you choose.

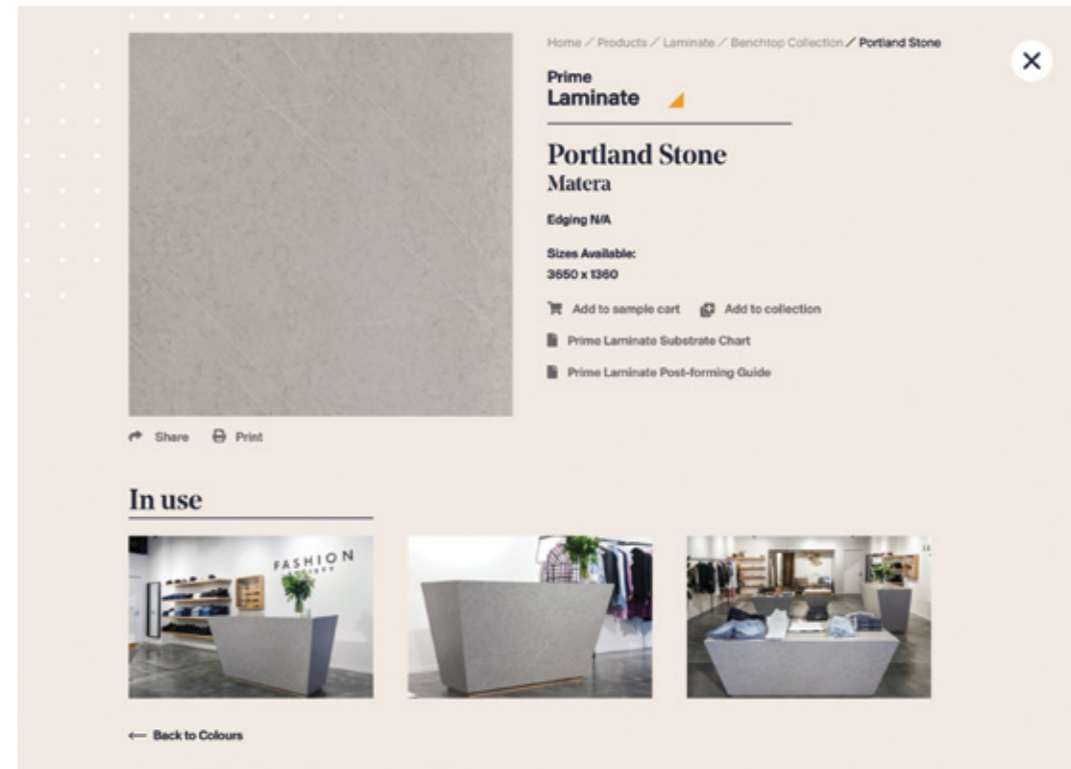

NPF = non post-formable

A/M = anti-microbial and anti-bacterial

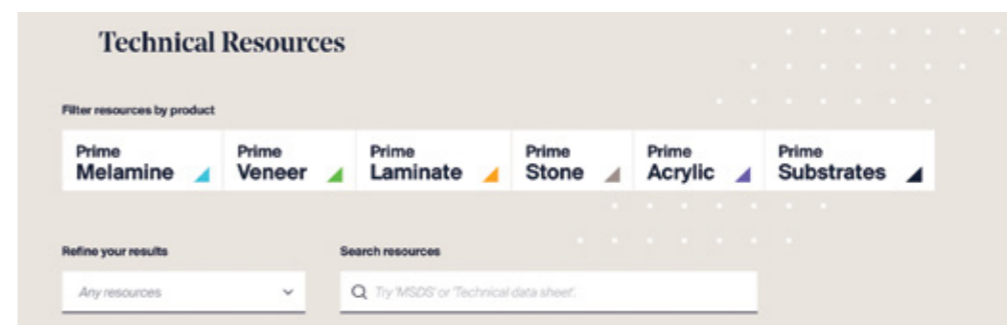

2. View installation images - If you see a camera icon on top of the swatch, it means installation images exist for that colour. Just click on the swatch to see these and also additional information about that colour.

You can also download a high resolution image of the full design to use for 3D renders in design programs. The swatch view will also indicate if the design has a match to our Prime Laminate range or a Resene colour

3. Comprehensive Technical Resources - Accessible from either the main Technical Resources page, or through the product pages, you can select which product, or technical resource type you need using the filters at the top. Our resources are always current and feature Technical Data Sheets, MSDS, warranty information, brochures, availability charts, board and folder layouts and other associated information.
